In 1839, Fuller moved the family to Jamaica Plain, Massachusetts. Fuller began women's discussion groups where Fuller would lead talks about the role of women in society. In 1839, Fuller was offered the job of editing the Transcendentalists' magazine "The Dial" by Ralph Waldo Emerson. The Transcendentalists were an influential philosophical movement in the Nineteenth Century. They believed in personal transformation and looking beyond religious dogmas. A biography is simply an account of someone's life written by another person. A biography can be short in the case of few sentences biography, and it can also be long enough to fill an entire book. The short biographies explain a person's basic life facts and their importance, but the long biographies would go an extra mile and include more details to make an interesting read. You may find yourself in a situation which requires you to write a biography of a famous person, a close friend or a relative. A biography, or simply bio, is a detailed description of a person's life. It involves more than just the basic facts like education, work, relationships, and death; it portrays a person's experience of these life events. Unlike a profile or curriculum vitae (résumé), a biography presents a subject's life story, highlighting various aspects of their life, including intimate details of experience, and may include an analysis of the subject's personality.
