

Kant's Critique of Pure Reason

Professor James Conant

Spring 2012

Syllabus

Description of the Course

This course will be devoted to an intensive study of selected portions of Kant's Critique of Pure Reason. The focus of the course will be on the Transcendental Analytic and especially the Transcendental Deduction. We will begin, however, with a brief tour of some of the central claims of the Transcendental Aesthetic. Some effort will be made to situate these portions of the first half of the Critique with respect to the later portions of the book, viz. the Transcendental Dialectic and the Doctrine of Method. Although the focus of the course will be on Kant's text, some consideration will be given to some of the available competing interpretations of the book. The primary commentators whose work will thus figure briefly in the course in this regard are Henry Allison, Matthew Boyle, Stephen Engstrom, Martin Heidegger, Dieter Henrich, John McDowell, Charles Parsons, Robert Pippin, Sebastian Roedl, Wilfrid Sellars, and Peter Strawson. Our interest in these commentators in this course will always only be as a useful foil for understanding Kant's text. No separate systematic study will be attempted of the work of any of these commentators. Of particular interest to us will be topics like Kant's criticisms of traditional empiricism, the distinction between sensibility and understanding, and his account of the relation between intuitions and concepts. The aim of the course is both to use certain central texts of recent Kant commentary and contemporary analytic Kantian philosophy to illuminate some of the central aspirations of Kant's theoretical philosophy and to use certain central Kantian texts in which those aspirations were first pursued to illuminate some recent developments in epistemology and the philosophy of mind.

Texts

All of the following textbooks have been ordered through the Seminary Co-op and are all required texts for the course:

1. Immanuel Kant, *Critique of Pure Reason*, trans. Norman Kemp Smith. ISBN: 978-0230013384
2. Immanuel Kant, *Logic*, (Dover Press edition), Robert S. Hartman and Wolfgang Schwarz. ISBN: 978-0486256504
3. Immanuel Kant, *Prolegomena to Any Future Metaphysics*, revised trans. Paul Carus and Lewis White Beck ISBN: 978-0023193309
4. Henry Allison, *Kant's Transcendental Idealism: An Interpretation and Defense*, Revised and Expanded Edition ISBN: 978-0300102666
5. P. F. Strawson, *The Bounds of Sense* ISBN: 978-0415040303

Some, but by no means all, of the readings assigned for the course is to be found in one of the five texts above. The rest of the readings will be made available through the Chalk site of the course. If you ever encounter any problem obtaining an assigned reading for the course, you should immediately contact the course assistants for the course by e-mail and let them know about the problem.

Structure of the Course and Related Issues

Meeting Times and Location: The course will meet on Tuesdays, from 3:00 to 6:00pm, in Harper 140.

Undergraduate Students: This course is open to any undergraduate who has secured permission to enroll in it.

Graduate Students: This course is open to all graduate students.

Policy on Auditors: Anyone with a serious interest in the topic is welcome to audit the course.

Chalk Site: There is a Chalk website for this course (chalk.uchicago.edu). All readings listed on the syllabus not available in one of the books ordered for the course are to be found on this site. In addition, a great many readings not mentioned on the syllabus are also to be found on this site. The latter generally pertain to topics discussed in passing in lecture and are made available for students who wish to pursue them further.

Announcements: Announcements (modifications to the syllabus, etc.) will periodically be posted to the Chalk site. Students are expected to keep abreast of these.

Course Participation: All students are expected to attend class regularly, be conversant with the required readings.

Undergraduate Discussion Sections: There will be four undergraduate discussion sections for the course, taught by Gilad Nir and Zack Loveless. Every undergraduate must be assigned to and regularly attend one of these sections. Weekly attendance of sections is mandatory for undergraduates. The time schedules and locations of these sections are: Wednesday 12:30-1:20 in Classics 405; Thursday 3:30-4:20 in Harper 141; Friday, 9:30-10:20 in Harper 150; and Friday, 12:30-1:20 in Classics 111.

Graduate Discussion Section: There will be a graduate discussion section for the course. It will be led by Professor Conant. It will meet on Wednesdays, from 3:00 to 4:00pm in Harper 103. The graduate section will begin meeting during the third week of the quarter. It is open to all PhD and MA students either enrolled in or auditing the course. Attendance of the graduate section is an optional component of the course for graduate students enrolled for credit.

Undergraduate Course Requirements: There are three required elements for the course: (1) mandatory attendance and participation in discussion sections, (2) a short midterm paper (6-8 pages) due by Monday, April 30th, at 5pm, at the beginning of week 6; (3) a longer paper (12-15 pages) due by 5pm on Friday, June 8th, of week 11. Special deadlines will be arranged for graduating seniors. All undergraduate papers are to be delivered to the course assistants, Gilad Nir or Zack Loveless, in hardcopy form.

Undergraduate Grade Breakdown: 15% for participation in discussion section; 35% for the short midterm paper, and 50% for the long final paper. To pass the course you must receive a passing grade in every required component of the course: A failing grade in any one of the three required components of the course will result in a failing grade for the course as a whole.

Graduate Course Requirements: Graduate students taking the course for credit are expected write a term paper at the end of the quarter, due on Friday, June 8th, of 11th week at 5pm. Papers are to be submitted via email to Prof. Conant in electronic form. The final paper is the only official requirement for graduate students enrolled in the course. It may be on any topic of your choice pertaining to themes covered in the lecture. Graduate student papers (both M. A. and Ph.D.) should be between 15 and 30 pages.

Policy on Extensions for Graduate Student Papers: Graduate students may hand in their final papers after the official due date and still receive credit for the course, only if they have secured permission from the professor to do so. Any student granted an extension should also be aware of the following: such papers will not be graded immediately upon receipt. The later the paper, the less promptly it will be graded.

Schedule of Meetings, Topics and Readings

First Meeting (March 27) - Organizational and Introductory Meeting

Themes of the course, explanation of approach, overview of the syllabus.

Overview of Kant's philosophy, overview of the structure of the *Critique*.
Explanation of basic terminology and bibliographical conventions.

Pink slips signed for any undergraduates who want to enroll in the course and have yet to receive permission.

No assigned reading.

Second Meeting (April 3rd) - Prefaces and Introduction

Required Readings:

Moore, Adrian, "The Transcendental Doctrine of Method"

Pure knowledge a priori is that with which no empirical Element is mixed up. For example, the proposition, "Every change has A cause," is a proposition a priori, but impure, because change is a Conception which can only be derived from experience.Â But as in the Use of these criteria the empirical limitation is sometimes more Easily detected than the contingency of the judgement, or the unlimited Universality which we attach to a judgement is often a more convincing Proof than its necessity, it may be advisable to use the criteria Separately, each being by itself infallible. Now, that in the sphere of human cognition we have judgements which are Necessary, and in the strictest sense universal, consequently pure a Priori, it will be an easy matter to show. Following Kant's Critique of Pure Reason (1781, 1787), this work presented a sophisticated idealist theory that viewed geometry as a description of the structure of spatial intuition.Â According to Kant, the Critique of Pure Reason comprised a treatise on methodology, a preliminary investigation prerequisite to the study of science, which placed the Newtonian method (induction, inference, and generalization) over against that of Descartes and Wolff (deduction from intuitions asserted to be self-evident). Kant published the Critique of Pure Reason in 1781. It is very long and almost unreadable due to its dry prose and complex terminology. Kant tried to ease his readers's confusion by publishing the Prolegomena to Any Future Metaphysics two years later. While it is hardly a page-turner, the Prolegomena is much briefer than the Critique and much more accessible in style, making it a valuable entry point to Kant's metaphysics and epistemology. Kant's primary aim is to determine the limits and scope of pure reason. That is, he wants to know what reason alone can determine without the help of the senses. This entirely new translation of Critique of Pure Reason is the most accurate and informative English translation ever produced of this epochal philosophical text. Though its simple and direct style will make it suitable for all new readers of Kant, the translation displays an unprecedented philosophical and textual sophistication that will enlighten Kant scholars as well. This translation recreates as far as possible a text with the same interpretative nuances and richness as the original. The extensive editorial apparatus includes informative annotation, detailed glossaries, an index, and a
