Anyone who has researched some of the more extraordinary human transpersonal capabilities will be familiar with the kinds of past lives, entity encounters, OBEs, psychic episodes and so forth which Grof details. He has very good case studies, but the theoretical standpoint is what interests. He illustrates many interesting phenomena unlocked by regression or sudden experience of the transpersonal. The mind is aware of far more than we think, and human fixations can stem from perceptions many psychologists have ruled out of bounds. By resetting those bounds Grof is revealing new aspects of huma... Zinabennett.Â Understanding consciousness through holotropic breathwork. If you are interested in the holographic model of the universe and consciousness, then you would like to read this book. The model is largely based on the work of physicist David Bohm and neurophysiologist Karl Pribram.Â The author concludes that human consciousness is an expression and reflections of cosmic intelligence that permeates the entire universe and all existence. We can view consciousness as three distinct levels: the conscious, the subconscious (or preconscious), and the unconscious. Buddhism has a sophisticated theory of mind but has undoubtedly containedâ€¦!Â We make use of our conscious mind when we take in input from our senses, analyse the information, and then make decisions based on this information. âœœThe mind is like an iceberg, it floats with one-seventh of its bulk above water.â€” Sigmund Freud. The conscious mind consists of what we are aware of at any given point in time. It includes the things that we are thinking about right now, whether itâ€™s in the front of our minds or the back. If weâ€™re aware of it, then it is in the conscious mind. The Holotropic Mind: The Three Levels of Human Consciousness and How They Shape Our Lives. By Stanislav Grof and Hal Zina Bennett.
