

The Paper Architect: Fold-It-Yourself Buildings and Structures

By Garrido, Marivi; Siliakus, Ingrid

Potter Craft, 2009. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: The Taj Mahal may have taken 22 years to build, but you can do it in less than a day! Using crisp folds and a craft knife, you can easily recreate the world's greatest architectural structures from ordinary sheets of paper. Whether you're building the White House after dinner or crafting an origami version of the Eiffel Tower in an afternoon and then folding it up to send to a friend in Paris The Paper Architect guides you through every step of the process. The directions for building these replicas are clear and easy to follow. In fact, the book contains an entire section of removable templates with color-coded fold lines that make construction simple enough for a first-time folder. All that's needed is a craft knife, a metal-edged ruler, a cutting mat, and a clear work surface. For those looking for more of a challenge, the patterns can be enlarged or traced onto special paper for endless variations. Each project also includes a wealth of information, from the history of the buildings and technical drawings to the raw materials used during construction. With...

Reviews

Unquestionably, this is the greatest job by any author. It really is simplistic but shocks inside the fifty percent in the book. I am just pleased to inform you that here is the greatest book i actually have go through within my own existence and could be he greatest ebook for at any time.

-- **Elva Kemmer**

A fresh electronic book with a brand new perspective. It is actually rally exciting through reading period of time. I am easily will get a enjoyment of looking at a composed pdf.

The Paper Architect: Fold-It-Yourself Buildings and Structures by Marivi Garrido (2009-02-03) [Marivi Garrido;Ingrid Siliakus] on Amazon.com. *FREE* shipping on qualifying offers. The Paper Architect: Fold-It-Yourself Buildings and Structures by Marivi Garrido (2009-02-03). Christine V. Pinterest. It is a well-known fact that with the invention of the steam engine and the growth of factories a number of civil engineers became interested in the practical application of the science of mechanics and thermodynamics to the design of machines. They separated themselves from civil engineering, and were called "mechanical engineers". With the development of the science of electricity, there appeared another branch of the engineering – electrical engineering. It is divided now into two main branches: communications engineering and power engineering. In the middle of the 20th century th Frank Lloyd Wright Paper Models: 14 Kirigami Buildings to Cut and Fold (paper folding, origami). Marc Hagan-Guirey. 4.6 out of 5 stars 204. Paperback. \$25.53. Le Corbusier Paper Models: 10 Kirigami Buildings To Cut And Fold. There is everything from bridges to tall vertical structures, edgy to round, ancient to modern. I think there is enough variety that after creating all the models in this book you could possibly figure out how to create other buildings on your own. If you want to make the models larger than the pattern in the book you can measure each cut and multiply them each by the same percent, (depending on how large or small you want to go), or you could scan the image and blow it up. There is a lot of entertainment to be had as this is a rather time consuming project.
