## Description:

### From the Back Cover

*Trends and Issues in Instructional Design and Technology, Third Edition*, provides readers with a clear picture of the field of instructional design and technology (IDT), the trends and issues that have affected it in the past and present, and those trends and issues likely to affect it in the future. This award-winning text will prepare its readers to master the skills associated with IDT, clearly describe the nature of the field, familiarize themselves with the field's history and its current status, and describe recent trends and issues impacting the field. Written by the leading figures in the field, it includes writings from Elizabeth Boling, Richard Clark, Ruth Clark, Walter Dick, Marcy

Driscoll, Michael Hannafin, John Keller, James Klein, David Jonassen, Richard Mayer, David Merrill, Charles Reigeluth, Marc Rosenberg, Allison Rossett, Sharon Smaldino, Harold Stolovitch, Brent Wilson, Robert Reiser, John Dempsey, and many others.

### **New to this edition:**

- **18 new chapters**, each of which focuses on an important recent trend or issue in the instructional design and technology field.
- An updated view of such topics as **whole task approaches to instructional design, motivational design, models of evaluation, performance support and informal learning**.
- **Section 9: Current Issues in Instructional Design and Technology** is entirely new with **4 new chapters addressing hot issues in IDT including ethics, diversity, accountability, the nature of the design process**, and the appropriate amount of learner guidance that should be built into instruction.
- **Five chapters focusing on IDT in various settings** introduce students to the wide variety of job opportunities available to IDT professionals.
- A stronger emphasis and new research on **how to design, deliver, and evaluate online instruction**, with field-tested techniques for instructional design of online learning.
- Four new and two revised chapters provide **coverage of technologies that are changing the nature of the IDT field**, including advances in such areas as e-learning, social networking, game-based learning, and virtual worlds.

***Previous editions of this textbook have received outstanding book awards*** from the Association for Educational Communications and Technology (AECT), the AECT Division of Design and Development, and the International Society for Performance Improvement (ISPI).

### **About the Author**

***John V. Dempsey*** is Professor and Chair of the Department of Behavioral Studies and Educational Technology and Director of the Online Learning Lab at the University of South Alabama. He has taught a Trends and Issues course for ten years. Dr. Dempsey has written numerous journal articles and chapters and coedited a book entitled *Interactive Instruction and Feedback*. A practicing instructional designer, he most recently completed an educational web site for the national weather service (NOAA) and is developing a series of educational CD-ROMs involving environmental education topics. Increasingly, his academic and professional interests focus on technology-based learning environments, but they are prone to drift hither and yon.

***Robert A. Reiser*** is Professor in the Instructional Systems program at Florida State University. He joined the Florida State faculty in 1976, after getting his doctorate in educational technology from Arizona State University in 1975. He has written two books and more than forty journal articles on instructional design and technology. In recent years, his research interests have focused on techniques for evaluating educational software and examining and improving the planning practices of teachers. Dr. Reiser is currently the principal investigator on a Knight Foundation project designed to promote the use of technology as an integral part of instruction practices in middle schools. In 2000, he was the sole recipient of the University Distinguished Teacher Award, the highest teaching award at Florida State University.

For courses in Instructional Design, Instructional Technology, or Computer-Based Instructional Design. Immerses students in the field and provides a strong foundation for future careers. In order to be successful in their field, professionals must go beyond performing the skills associated with Instructional Design and Technology (IDT); they must recognize current and future trends likely to impact the field and envision how to employ them. Trends and Issues in Instructional Design and Technology, Fourth Edition helps students and future practitioners attain these goals. It defines the IDT field Emerging technologies, strategies to improve teaching and learning environments, and current practices in a wide variety of settings are among the many topics discussed in depth. Previous editions of this acclaimed text won numerous awards from the Association for Educational Communications and Technology and the International Society for Performance Improvement. About the Author. I received a book from Amazon today 7/7/20, Trends and Issues in Instructional Design and Technology. While this is a used book I certainly did not expect it to be like new, but I did not expect a book that looks old, dirty, and coming apart at the seams. There were far too many pages highlighted and folded back. Instructional Design and Teaching included resources about the role of tempo in teaching, formative and summative evaluation strategies, and instructional coaching during the pandemic. Security and Citizenship included resources about TikTok parental controls, new security features for Zoom, and a push back against automated proctoring services while at the same time there is an increased interest in their use. (2020, December 1). Episode 174. Trends and issues in instructional design, educational technology, and learning sciences [Audio Podcast]. Retrieved from <http://trendsandissues.com/>. 22. Instructional Design in Europe: Trends and Issues -- Jeroen J. G. van Merriënboer, Begoña Gros, and Helmut Niegemann. 23. Instructional Design and Technology in an Asian Context: Focusing on Japan and Korea -- Katsuaki Suzuki and Insung Jung. VII. Getting an IDT position and succeeding at IT. 24. Getting an Instructional Design Position: Lessons from a Personal History -- Robert A. Reiser. 25. Performance Consulting -- Catherine Tenzca and Judith Hale. 26. Getting Involved in Instructional Design and Technology: Recommendations for Professional Development -- James D. Klein and Nick Rushby
