Description:

About the Author

Laura E. Berk is a distinguished professor of psychology at Illinois State University, where she has taught human development to both undergraduate and graduate students for more than three decades. She received her bachelor's degree in psychology from the University of California, Berkeley, and her master's and doctoral degrees in child development and educational psychology from the University of Chicago. She has been a visiting scholar at Cornell University, UCLA, Stanford University, and the University of South Australia.

Berk has published widely on the effects of school environments on children's development, the development of private speech, and most recently the role of make-believe play in development. Her research has been funded by the U.S. Office of Education and the National Institute of Child Health and Human Development. It has

appeared in many prominent journals, including *Child Development*, *Developmental Psychology*, *Merrill-Palmer Quarterly*, *Journal of Abnormal Child Psychology*, *Development and Psychopathology*, and *Early Childhood Research Quarterly*. Her empirical studies have attracted the attention of the general public, leading to contributions to *Psychology Today* and *Scientific American*. She has also been featured on National Public Radio's *Morning Edition* and in *Parents Magazine*, *Wondertime*, and *Reader's Digest*.

Berk has served as a research editor for *Young Children* and a consulting editor for *Early Childhood Research Quarterly*. Currently, she is an associate editor for the *Journal of Cognitive Education and Psychology*. She is a frequent contributor to edited volumes on early childhood development, having recently authored chapters on the importance of parenting, on make-believe play and self-regulation, and on the kindergarten child. She has also written the chapter on development for *The Many Faces of Psychological Research in the Twenty-First Century* (Society for the Teaching of Psychology); the article on social development for *The Child: An Encyclopedic Companion*; the article on Vygotsky for the *Encyclopedia of Cognitive Science*; and the chapter on storytelling as a teaching strategy for *Voices of Experience: Memorable Talks from the National Institute on the Teaching of Psychology* (Association for Psychological Science).

Berk's books include *Private Speech: From Social Interaction to Self-Regulation*; *Scaffolding Children's Learning: Vygotsky and Early Childhood Education*; *Landscapes of Development: An Anthology of Readings*; and *A Mandate for Playful Learning in Preschool: Presenting the Evidence*. In addition to *Exploring Lifespan Development*, she is author of the best-selling texts *Child Development* and *Infants, Children, and Adolescents*, and *Development Through the Lifespan* published by Allyn and Bacon. Her book for parents and teachers is *Awakening Children's Minds: How Parents and Teachers Can Make a Difference*.

Berk is active in work for children's causes. In addition to service in her home community, she is a member of the national board of directors and chair of the central region advisory board of Jumpstart, a nonprofit organization that provides one-to-one literacy intervention to thousands of low-income preschoolers across the United States, using college and university students as interveners. Berk is a fellow of the American Psychological Association, Division 7: Developmental Psychology.

Understanding the concepts of life-span development and how changes occur physically, mentally and socially across a person's lifespan. What is Lifespan Development? This article focuses on discussing the questions; "What is lifespan development?" and "How do we define lifespan development in psychology?" It is an old saying that the only thing that remains the same is change. Changes are always occurring through the course of a person's life. 1 Exploring Lifespan Development Chapter 6 Emotional and Social Development in Infancy and Toddlerhood This multimedia product and its contents are protected under copyright law. The following are prohibited by law: Any public performance or display, including transmission of any image over a network; Preparation of any derivative work, including the extraction, in whole or in part, of any images; Any rental, lease, or lending of the program. Exploring Lifespan Development , Fourth Edition is also available via Revel, an interactive digital learning environment that is a less expensive alternative to the print textbook, enabling students to read, practice, and study in one continuous experience. Revel's new mobile app lets students access and interact with their text anywhere, anytime, on any device, giving students the flexibility of toggling between their phone, tablet, and laptop as they move through their day. Lifespan development explores how we change and grow from conception to death. This field of psychology is studied by developmental psychologists. They view development as a lifelong process that can be studied scientifically across three developmental domains: physical, cognitive development, and psychosocial. There are many theories regarding how babies and children grow and develop into happy, healthy adults.
