But the only way to have a specialty be "easy" is to be lazy. Whatever you do, you have a responsibility to keep up with advances in your field, think critically about the patients and problems around you, and do your best to interface your treatment plan with the patient's desires and the complex medical systems that surround them. Don't ask easy. Ask controllable lifestyle. Ask shortest time to completion of training. Ask what fields you don't have to actually touch patients. But none of it is easy, unless you don't care.
