This classic guide offers an accessible initiation into the mysteries of violin-making. Charming in its style and cultivated in its research, it covers every detail of the process and includes a fascinating history of the instrument. More than 200 diagrams, engravings, and photographs complement the text. 1885 edition. [Home](#) | [Viola String Set](#) | [Violin String Set](#) | [Cello String Set](#) | [Cello Strings](#) | [Viola Strings](#) | [Violin Strings](#) | [Shoulder Rest](#) | [Chin Rest](#) | [Viola Case](#) | [Cello Case](#) | [Violin Case](#) | [Bow Cases](#) | [Cello Outfit](#) | [Viola Outfit](#) | [Violin Outfit](#) | [Sitemap](#). The purpose of this guide is to give basic information about violin making. The aspiring violin maker will have the opportunity to build an instrument from start to finish with the help of step by step tutorials accompanied by drawn images. To make the best of the electronic format, all the images are in vector graphic format SVG, drawn to exact real world dimensions. At every step of you building experience you can print out the plans and drawings and use them in direct comparison with what you have at hand. The SVG graphic format is supported by most modern browsers and editable by the free Inkscape. Make sure that the violin case is neither in the way where it can get knocked over in passing, nor kept on a shelf or in a closet where it can fall down when other items are retrieved. Although a corner would appear to be an ideal spot to keep a stringed instrument out of harm's way, one must exercise caution: the walls may be very cold, particularly in old buildings. The violin would then be exposed to warm, room-temperature air on one side and a cold wall on the other - a dangerous combination that could cause cracks. Finding a student violin in the proper size. Contemporary violin makers from China and Taiwan. Silent electric violins - a guide to technical standards and quality characteristics. Online catalog. He also makes violins in his spare time. He made his first violin at the age of 14 with the help of one of his teachers at Chethams school of music. We asked him to take us through the process, from the moment the wood arrives to the finished instrument. Using those lines as a guide and then cut a channel with a surgical knife (trying hard not to cut your fingers!) until you have a channel that's deep enough (about 2mm) to go round with the purfling cutter (the middle of the three tools pictured below). Mitre the corners into a bee-sting (see picture "Stradivari was particularly good at this").

The truth is that the violin is not limited to classical music anymore and is a center piece of many other music genres. And with so much resources available on the internet nowadays, reaching a decent level on the violin is now easier AND quicker than ever. So for today's post, I compiled everything you need to know in order to get started on this beautiful instrument. Sounds good? Because trust me, any good violinist will make a cheap violin sound good. Got it? Then let's move on! Making an instrument of the violin family, also called lutherie, may be done in different ways, many of which have changed very little in nearly 500 years since the first violins were made. Some violins, called "bench-made" instruments, are made by a single individual, either a master maker, or an advanced amateur working alone. Several people may participate in the making of a "shop-made" instrument, working under the supervision of a master. This was the preferred method of old violin makers who Violins are the smallest stringed instrument in an orchestra and can be used for a wide variety of musical styles. While you can always buy a violin from a music store, making your own can create a unique sound and make your instrument one... Guide a wood scraper down the length of the violin to remove the excess wood that's on top. Make smooth slopes coming from the center of the violin to the flat edge around the outside you already carved. Make sure the highest point of the arch is about 16-18 millimetres (0.63-0.71 in) up from the bottom of the piece. X Research source. The bass bar helps the sound inside your violin resonate to make a more pleasant tone. Spruce is the traditional wood to use for a violin, but you can use other hardwoods if you want. Advertisement.
